

## Web Security.cloud

# Get peace of mind by protecting your business from web-borne threats

Protect your business against web-borne threats, enabling control, monitoring and enforcement of web acceptable use policies with minimal latency. Powered by Symantec.cloud Sceptic predictive technology, Claranet SOHO Web Security services make sure all web content is scanned for malware before reaching your network.

## Antivirus and Antispyware Protection

Web Security.cloud provides your business with a web based security package that protects your network and employees whilst using the internet. The anti-malware layers are automatically updated blocking the latest threats that can harm your business.

- Web anti-virus protection - 100% protection against known viruses
- Latency - average time for web content scanning is within 100 milliseconds
- Blocks malware and secures web traffic using multiple commercial engines
- Can be sold separately from URL filtering

## URL Filtering

URL filtering allows your business to block access to certain websites and reduce web misuse whilst protecting your bandwidth. Flexible options are available that allow you to set rules for certain users, times of day and internet usage consumption.

- Packages available that give you daily reporting
- Can be configured to company's acceptable IT usage policy
